

IncidentAnalytix

Cloud Solutions for Incident Tracking & Data Analytics

Elevate your Risk Management Practices to a whole new level with the **IncidentAnalytix Platform**

Managing risk effectively means understanding your incident trends. Organizations must be able to effectively track and analyze detailed information about incidents and close calls in real time. With actionable data, users can quickly evaluate trends and implement programmatic responses. The IncidentAnalytix Platform provides a complete Software-as-a-Service hosted in the Cloud with multiple solutions to meet your specific needs.

Solutions for Any Size Organization

Public Cloud: Expand your insights with the Power of Many

Our Public Cloud is perfect for small to medium-sized organizations. Our multi-tenant system securely isolates your data. For analytics purposes we merge anonymized data across the Public Cloud giving you the *power of many* expanding your insights by allowing you to compare your trends to larger industry trends enhancing your own risk management practices.

Private Cloud: Your own Vertical Integration Platform

Our Private Cloud offers Associations, Membership Organizations, and Large Entities the option to create your own private cloud server with multiple isolated tenants each with multiple users and collective analytics allowing vertical integration for common incident tracking portfolios.

Self-Hosted: Complete Customization for your Enterprise

Corporations and Government Agencies can purchase an independent software license allowing them to host a multi-tenant/multi-user system on their own servers as well as fully customize the software, database schema & analytics for their unique needs.

Advanced Incident Tracking & Data Analytics in the Cloud

Software-as-a-Service hosted in the Cloud means that you get the latest technology without having to maintain costly servers and complex software installations. We provide the hosting environment, secure servers, the most advanced Incident Database Tracking system available, customizable access, and advanced reporting and data analytics all in one complete package.

Cloud Hosted

We provide a complete Cloud-Hosted Solution on the Microsoft Azure Cloud Platform including fault-tolerant servers, database backup and recovery and Web application firewall security.

Enterprise Solution

Designed from the ground up as a fully-integrated Software-as-a-service solution using the latest software design patterns, continuous deployment, robust security, user-friendly interface & more.

Real-time Analytics

Our intuitive user interface allows your users to easily drill into your data. Our Power BI Analytics integration gives you real-time analysis of trends and patterns.

Actionable Insights from Interactive Data Analytics

One of the special features of the IncidentAnalytix System is the ability to explore your data through our rich analytics platform. This is real-time live data updated as new data comes in. Filter, select and drill down into specifics of your incident data to identify trends and take action.

- ✓ Terrain
- ✓ Equipment Involved
- ✓ Property Damage

Administration

- ✓ Causal Factors
- ✓ Incident Analysis
- ✓ Legal & Insurance
- ✓ Recommendations
- ✓ Link to Documents
- ✓ Link to Images & Video

Tracking Incident Data is complex. Understanding what data to collect, designing a complete database system, developing data entry forms and online reports, ensuring consistent data entry, and building a robust reporting and analytics system is a huge undertaking often out of reach for many organizations. IncidentAnalytix solves all of that by providing you with a comprehensive Cloud-based solution for all of your incident tracking and risk management assessment needs.

Our secure sign-in system and specialized User Roles allow you to easily configure and control access across your entire organization. We utilize enterprise-level security to ensure that your data is protected and only accessible to your organization. Within your Profile you create custom Security Roles that manage access only to those areas of the site that you choose and you assign appropriate permissions to each User.

Features on all Editions

Enterprise Features

- ✓ **Advanced** Data Collection & Incident Tracking
