

# IncidentAnalytix

## Risk Management Solutions in the Cloud

---

### **Elevate Your Risk Management Standard**

In this era where the landscape of risks is continually evolving, organizations must adopt a proactive and informed approach to risk management. Enhancing safety within your organization requires understanding your incident trends and risk exposure. IncidentAnalytix provides the most comprehensive and customizable cloud-based Risk Management Information System available allowing organizations to collect and analyze incident and close call data to build a comprehensive picture of risk.

IncidentAnalytix revolutionizes risk management by systematically collecting and analyzing incident data, empowering organizations to proactively address risks with informed, strategic decisions. This comprehensive approach ensures employee safety, optimizes resources, maintains compliance, and upholds your organization's reputation, ultimately fostering a safer work environment. With its customizable, cloud-based web application, IncidentAnalytix offers 24/7 access to your data, featuring secure login, role-based user access, data analytics, and robust reporting capabilities.

---

### **Why your organization needs a Risk Management Information System**

#### **Case #1 - Workplace Health & Safety**

In the multifaceted environment of any organization, managing safety across diverse activities is crucial. This includes offices, manufacturing floors, field operations, and company events. IncidentAnalytix offers a comprehensive solution to monitor and assess organizational risk daily, tracking both incidents and near misses across all activities, promoting a safer working environment.

#### **Case #2 - Compliance & Regulatory Reporting**

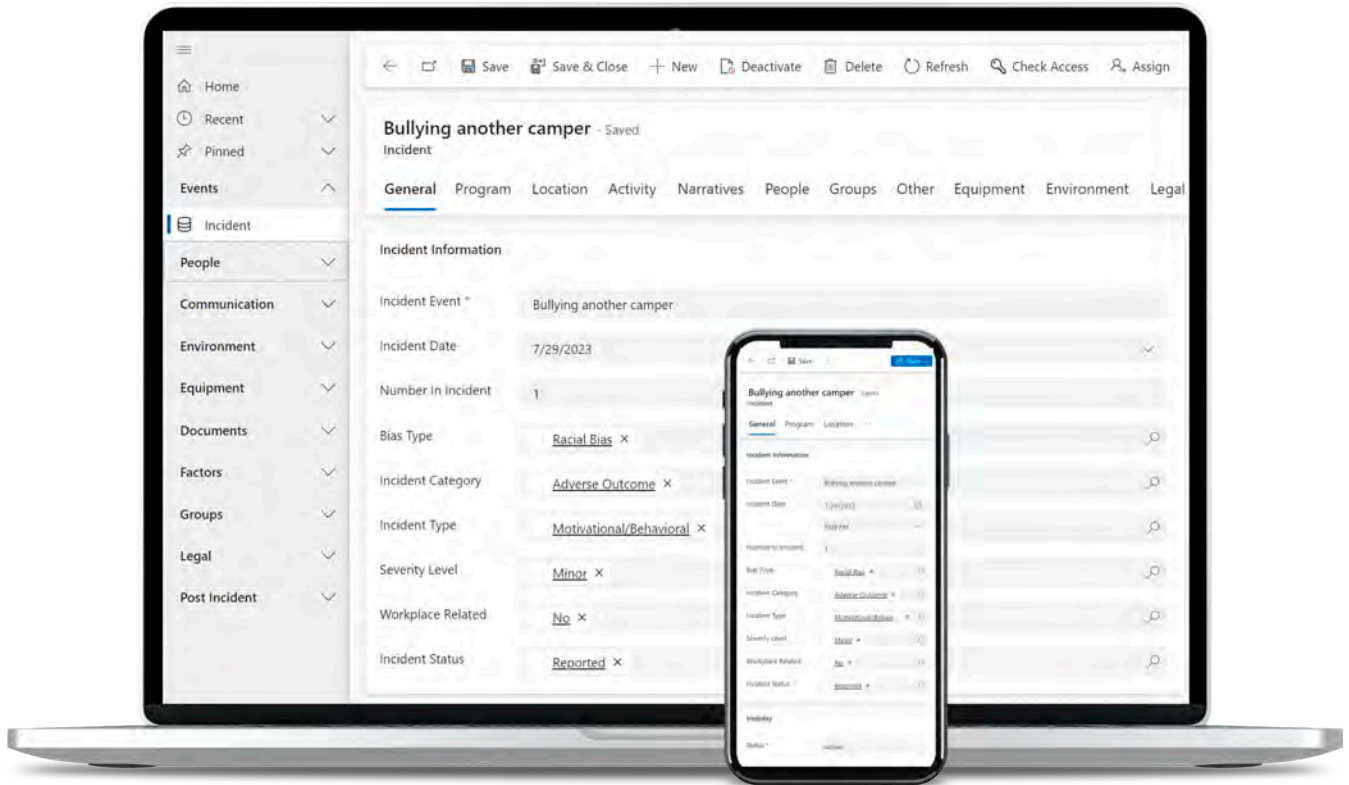

Organizations face numerous compliance and regulatory requirements that necessitate meticulous tracking and reporting of incidents. IncidentAnalytix streamlines this process by providing a centralized platform for real-time reporting and documentation, ensuring your organization meets all regulatory standards and maintains compliance with industry-specific guidelines.

#### **Case #3 - Field Work & International Operations**

Operations in off-site and international locations present significant risks since they operate outside of many of the normal organizational control structures. The risks associated with international travel, remote locations, and field work require real-time monitoring. IncidentAnalytix excels in managing the unique risks associated with such programs, providing incident data collection wherever your employees are operating.

#### **Case #4 - Field Work & International Operations**

The increasing instances of bias and harassment demand proactive measures. Official channels often capture only a fraction of occurrences, leading to a distorted understanding of the true extent of the issue. IncidentAnalytix empowers organizations by providing anonymous reporting tools, enabling a more accurate assessment and understanding of bias incidents and ensuring a respectful and inclusive workplace atmosphere.

## Incident Data Collection Made Easy

Tracking Incident Data is complex. Understanding what data to collect, designing a complete database schema, developing data entry forms and online reports, ensuring consistent data entry, and building a robust reporting and analytics system is a huge undertaking. IncidentAnalytix solves all of that by providing you with a comprehensive Cloud-based solution for all of your incident tracking and risk management assessment needs.

Incidents happen day or night. IncidentAnalytix on the Microsoft 365 Cloud provides your users with 24/7 data access. Designed with an intuitive and flexible user interface, the system makes it easy to enter, search, filter and review your data.

Our multi-level data collection process allows you to capture comprehensive information about incidents and close calls throughout your program. At each data level you determine how much information is essential to record. You control the user privileges to grant or limit access to what data is visible and accessible to your users.

### Data Collection Features

- ✓ Advanced Hierarchical Data Schema for comprehensive Incident Tracking
- ✓ Structured Data Collection provides Consistent Analysis
- ✓ Lookup Tables and Custom Data Fields

### Security Features

- ✓ Data Isolation with Row-Level and Column-Level Security
- ✓ Central Management of your Users
- ✓ Role-based Permissions for access
- ✓ Microsoft secure logins including multi-factor authentication and conditional access policies

### User Interface Features

- ✓ SmartGrids provide Searching, Filtering, & Sorting
- ✓ Easily drill down into your data
- ✓ Customizable User Interface that is ADA compliant and responsive on all devices

## Actionable Insights From Powerful Data Analytics

IncidentAnalytix allows you to explore your data through powerful integration with the Microsoft Power BI data analytics platform. Live data updated in real-time is fully interactive. Filter, select, and drill down into specifics of your incident data to identify trends and prioritize action steps.

# An Open Solution That Grows With You

The screenshot displays the 'Active Incidents\*' section of the IncidentAnalytix interface. It features a table with columns for Incident Event, Incident Date, Incident Category, Incident Type, Severity Level, and Activity Type. The table lists eight incidents, each with a checkbox and a right-pointing arrow in the first column. The interface also includes a search bar for filtering by keyword, and options to edit columns and filters.

| Incident Event ↑   | Incident Date ↓    | Incident Category    | Incident Type           | Severity Level | Activity Type              |
|--|--------------------|----------------------|-------------------------|----------------|----------------------------|
| <input type="checkbox"/> > Bullying another camper                       | 9/20/2023 8:00 PM  | Adverse Outcome      | Motivational/Behavioral | Minor          | Summer Camp STEM program   |
| <input type="checkbox"/> > Inappropriate Sexual contact                  | 9/13/2023 5:30 PM  | Adverse Outcome      | Title IX violation      | Minor          | Service project            |
| <input type="checkbox"/> > Suicidal gesture                              | 9/10/2023 1:00 AM  | Close Call/Near Miss | Psychological           | Moderate       | Not Specified              |
| <input type="checkbox"/> > Heat Stroke on football field                 | 9/8/2023 5:15 PM   | Adverse Outcome      | Illness                 | Serious        | Varsity Athletics          |
| <input type="checkbox"/> > Attempted Theft on international study abroad | 9/1/2023 3:30 PM   | Close Call/Near Miss | Crime                   | No impact      | International Study Abroad |
| <input type="checkbox"/> > Broken leg from fall during field research    | 8/24/2023 11:00 AM | Adverse Outcome      | Injury                  | Moderate       | Graduate Field Research    |
| <input type="checkbox"/> > Concussion from soccer game impact with g...  | 8/16/2023 4:00 PM  | Adverse Outcome      | Injury                  | Minor          | Varsity Athletics          |
| <input type="checkbox"/> > Racial slur poster in dorm bathroom           | 8/9/2023 10:00 PM  | Close Call/Near Miss | Harassment              | Moderate       | Residence Hall             |

Welcome to a new era of incident analysis and risk management with IncidentAnalytix Microsoft Power Platform Edition. Power Platform integration is a revolution in how organizations approach risk management, providing unparalleled insights, secure and unified data management, complete customization, compliant and user-friendly experiences to navigate your risk landscape with insight and agility, fostering a proactive and informed approach to risk management and workplace safety.

## Powered by the Microsoft Power Platform

- **Unified Data Platform:** Microsoft Power Apps on Dataverse or Azure SQL provides a unified and scalable data storage solution, enabling streamlined integration and management of data from varied sources, enhancing the robustness of IncidentAnalytix.
- **Fully Secure and Compliant:** Benefit from Microsoft's stringent security protocols and compliance certifications, ensuring the integrity and confidentiality of your critical incident data along with complete role-based security using your Microsoft 365 Account and Azure Active Directory.
- **Custom Tailored Solutions:** The Power Apps platform allows for extensive customization, enabling you to tailor IncidentAnalytix to suit the unique needs and objectives of your organization and grow and expand with your organization.
- **Integrated Analytics and Intelligence:** Allow your users to leverage the analytical capabilities of Power BI transforming your data into actionable insights and informed decision-making tools. Use the latest Microsoft CoPilot AI capabilities to query and understand your data.
- **Automate Workflows:** Utilize Power Automate to create automated workflows for automatic notifications, review, and approvals, increasing efficiency and allowing your team to focus on strategic risk management initiatives.
- **Intuitive Interface:** The user-friendly interface of Power Apps ensures a seamless and intuitive user experience, fostering user adoption and engagement. Responsive on any device.
- **Mobility and Accessibility:** Access IncidentAnalytix on the go, from any device, ensuring that your team has the information they need when they need it. Add IncidentAnalytix to Microsoft Teams for robust collaboration capabilities.
