

IncidentAnalytix

Risk Management Solutions for Youth Organizations

Elevate your Risk Management Practices

Protecting your participants, staff, volunteers, and your organization requires understanding incident trends. Systematic collection and analysis of incident data is pivotal for enhancing risk management strategies. It enables organizations to be proactive, informed, and strategic in addressing risks, ensuring the safety and well-being of the community, optimizing resources, and maintaining compliance and reputation, ultimately contributing to the creation of a more secure and conducive learning environment.

In this era where the landscape of risks is continually evolving, institutions must adopt a proactive and informed approach to risk management. IncidentAnalytix provides the most comprehensive cloud-based Risk Management Information System available that allows you to collect and analyze incident and close call data to build a comprehensive picture of your risk, enabling organizations to navigate through the complexities of risk with enhanced precision and foresight. IncidentAnalytix combines a customizable cloud-based Web Application that gives you complete access to your data with features including secure login, role-based user access, data analytics and reporting.

Why your organization needs a Risk Management Information System

Case #1 - Program Health & Safety

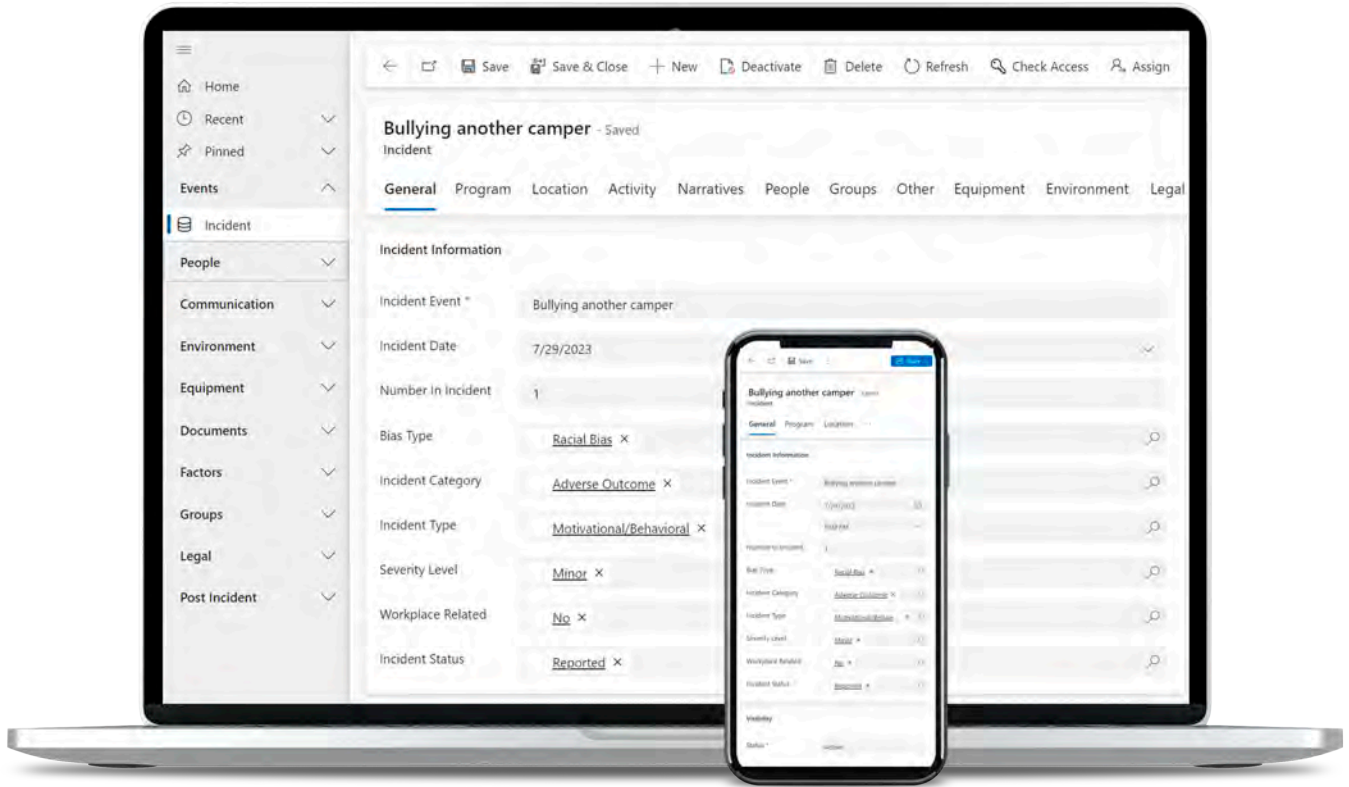

In the multifaceted environment of youth organizations, managing safety across diverse activities is crucial. This includes camps, workshops, sports, recreational events, and community service projects. IncidentAnalytix is essential, offering a comprehensive solution to monitor and assess risk daily. It tracks both incidents and near misses across all activities, providing detailed analytics and insights to identify potential hazards. By implementing proactive measures based on real-time data, organizations can promote a safer environment for all participants, enhancing the overall experience and peace of mind for parents and guardians.

Case #2 - Safety for Minors

Youth organizations recognize the specific challenges of providing safe environments for minors. IncidentAnalytix offers a real-time reporting system where 'see something, say something' is as simple as opening the app and submitting a report. The system is designed for ease of use, ensuring that both staff and participants can quickly and efficiently report any safety concerns or incidents. This real-time data collection allows for immediate action and response, significantly reducing the risk of harm. Detailed reporting and analytics provide insights into recurring issues, enabling organizations to implement preventative measures and continually improve safety protocols.

Case #3 - Offsite Activities & Travel

Programs that operate offsite or involve travel present significant risks due to operating outside normal control structures. The risks associated with travel, remote locations, and various field activities require real-time monitoring. IncidentAnalytix excels in managing the unique risks associated with these programs, providing incident data collection wherever your staff and participants are engaged. Detailed incident logs and analytics help organizations understand and mitigate risks associated with offsite activities, ensuring the safety and well-being of all participants during trips and excursions.

Incident Data Collection Made Easy

Tracking Incident Data is complex. Understanding what data to collect, designing a complete database schema, developing data entry forms and online reports, ensuring consistent data entry, and building a robust reporting and analytics system is a huge undertaking. IncidentAnalytix solves all of that by providing you with a comprehensive Cloud-based solution for all of your incident tracking and risk management assessment needs.

Incidents happen day or night. IncidentAnalytix on the Microsoft 365 Cloud provides your users with 24/7 data access. Designed with an intuitive and flexible user interface, the system makes it easy to enter, search, filter and review your data.

Our multi-level data collection process allows you to capture comprehensive information about incidents and close calls throughout your program. At each data level you determine how much information is essential to record. You control the user privileges to grant or limit access to what data is visible and accessible to your users.

Data Collection Features

- ✓ Advanced Hierarchical Data Schema for comprehensive Incident Tracking
- ✓ Structured Data Collection provides Consistent Analysis
- ✓ Lookup Tables and Custom Data Fields

Security Features

- ✓ Data Isolation with Row-Level and Column-Level Security
- ✓ Central Management of your Users
- ✓ Role-based Permissions for access
- ✓ Microsoft secure logins including multi-factor authentication and conditional access policies

User Interface Features

- ✓ SmartGrids provide Searching, Filtering, & Sorting
- ✓ Easily drill down into your data
- ✓ Customizable User Interface that is ADA compliant and responsive on all devices

Advanced Incident Tracking & Data Analytics in the Cloud

IncidentAnalytix is a complete Software-as-a-Service solution you install on your Microsoft 365 environment. We provide a fully customizable solution that can grow as your needs expand. It is the most advanced Risk Management Information system available with advanced reporting and data analytics in one complete package. Access and security is handled through your Microsoft Azure Active Directory.

Comprehensive Incident Tracking That You Control

Incidents

- ✓ Incidents & Close Calls
- ✓ Date & Time
- ✓ Program Type
- ✓ Severity Level
- ✓ Bias/Harassment
- ✓ Injury & Illness
- ✓ Behavioral Issues
- ✓ Treatment/Medication

People

- ✓ Persons Impacted
- ✓ Persons Alleged
- ✓ Staff
- ✓ Participants
- ✓ Witnesses
- ✓ Groups Involved
- ✓ People Notified
- ✓ Consequences

Activity/Environment

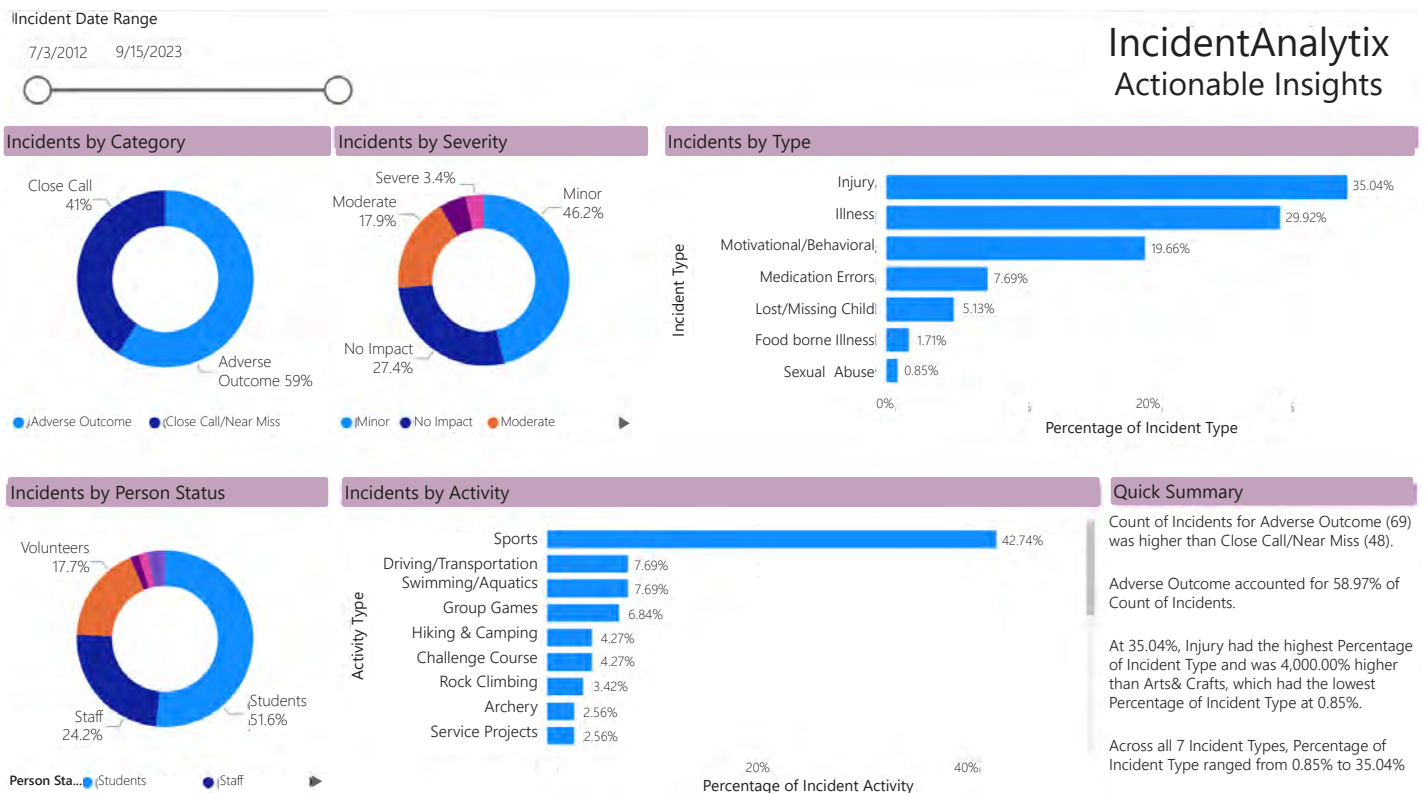

- ✓ Program Activity
- ✓ Supervision Level
- ✓ Age Group
- ✓ Campus Location
- ✓ Environmental Conditions
- ✓ Equipment Involved
- ✓ Property Damage
- ✓ Vehicles

Administration

- ✓ Causal Factors
- ✓ Mitigating Factors
- ✓ Legal Actions
- ✓ Police Reports
- ✓ Insurance Claims
- ✓ Post-incident Response
- ✓ Required Reporting
- ✓ Link to Files/Images

Actionable Insights From Powerful Data Analytics

IncidentAnalytix allows you to explore your data through powerful integration with the Microsoft Power BI data analytics platform. Live data updated in real-time is fully interactive. Filter, select, and drill down into specifics of your incident data to identify trends and prioritize action steps.

An Open Solution That Grows With You

The screenshot displays the IncidentAnalytix interface. At the top, there is a header for 'Active Incidents*' with a dropdown arrow. To the right of the header are three buttons: 'Edit columns', 'Edit filters', and 'Filter by keyword'. Below the header is a table with the following columns: Incident Event, Incident Date, Incident Category, Incident Type, Severity Level, and Activity Type. The table contains eight rows of incident data.

Incident Event	Incident Date	Incident Category	Incident Type	Severity Level	Activity Type
Bullying another camper	9/20/2023 8:00 PM	Adverse Outcome	Motivational/Behavioral	Minor	Summer Camp STEM program
Inappropriate Sexual contact	9/13/2023 5:30 PM	Adverse Outcome	Title IX violation	Minor	Service project
Suicidal gesture	9/10/2023 1:00 AM	Close Call/Near Miss	Psychological	Moderate	Not Specified
Heat Stroke on football field	9/8/2023 5:15 PM	Adverse Outcome	Illness	Serious	Varsity Athletics
Attempted Theft on international study abroad	9/1/2023 3:30 PM	Close Call/Near Miss	Crime	No impact	International Study Abroad
Broken leg from fall during field research	8/24/2023 11:00 AM	Adverse Outcome	Injury	Moderate	Graduate Field Research
Concussion from soccer game impact with g...	8/16/2023 4:00 PM	Adverse Outcome	Injury	Minor	Varsity Athletics
Racial slur poster in dorm bathroom	8/9/2023 10:00 PM	Close Call/Near Miss	Harassment	Moderate	Residence Hall

Welcome to a new era of incident analysis and risk management with IncidentAnalytix Microsoft Power Platform Edition. Power Platform integration is a revolution in how organizations approach risk management, providing unparalleled insights, secure and unified data management, complete customization, compliant and user-friendly experiences to navigate your risk landscape with insight and agility, fostering a proactive and informed approach to risk management and campus safety.

Powered by the Microsoft Power Platform

- **Unified Data Platform:** Microsoft Power Apps on Dataverse or Azure SQL provides a unified and scalable data storage solution, enabling streamlined integration and management of data from varied sources, enhancing the robustness of IncidentAnalytix.
- **Fully Secure and Compliant:** Benefit from Microsoft's stringent security protocols and compliance certifications, ensuring the integrity and confidentiality of your critical incident data along with complete role-based security using your Microsoft 365 Account and Azure Active Directory.
- **Custom Tailored Solutions:** The Microsoft Power Apps platform allows for extensive customization, enabling you to tailor IncidentAnalytix to suit the unique needs and objectives of your organization and grow and expand with your organization.
- **Integrated Analytics and Intelligence:** Allow your users to leverage the analytical capabilities of Power BI transforming your data into actionable insights and informed decision-making tools. Use the latest Microsoft CoPilot AI capabilities to query and understand your data.
- **Automated Workflows:** Utilize Power Automate to create automated workflows for automatic notifications, review, and approvals, increasing efficiency and allowing your team to focus on strategic risk management initiatives.
- **Intuitive Interface:** The user-friendly interface of Power Apps ensures a seamless and intuitive user experience, fostering user adoption and engagement. Responsive on any device.
- **Mobility and Accessibility:** Access IncidentAnalytix on the go, from any device, ensuring that your team has the information they need when they need it. Add IncidentAnalytix to Microsoft Teams for robust collaboration capabilities.
